

Product Code: TS-DRS-002

Diamond Reaming Shells

Description:

Cylindrical diamond reaming shells connected with bits for simultaneous drilling and side surface grinding. Prevents early wear of bit outer diameter and hole wall deformation.

Technical Specifications

Connection: Connected with core bit for simultaneous operation	Function: Drilling by bit and grinding of side surface simultaneously
Purpose: Prevent early wear of bit outer diameter	Shape: Cylindrical with diamond particles on outside diameter
Construction: Touchable screws at both ends	Diameter Design: Outside diameter larger than that of the bit
Performance: Excellent life span and reaming ability	Material Quality: High quality shank and natural diamond
Applications: General rocks and strong rock formations	Quality Advantage: Superior life span compared to competitors
